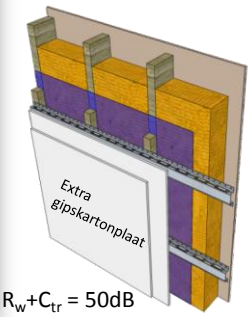
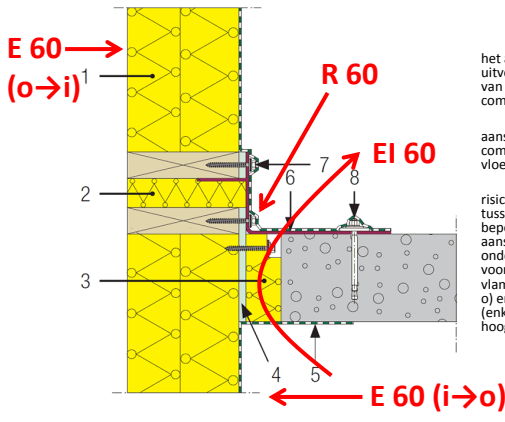
- Gipskartonplaat 12,5mm



R_w+C_{tr} = 50dB

GEVELELEMENTEN : BRANDWEERSTAND

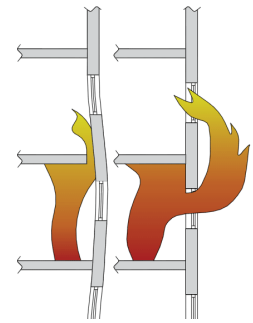
- Beperken van de voortplanting
- Eisen in het KB (art. 3.5.1 enkelwandige gevels)



het anker R60 beschermd uitvoeren tegen brand komende van de naast- en onderliggende compartimenten

aansluiting compartimentswanden en –vloeren met gevel minimaal EI60

risico branduitbreiding via gevel tussen compartimenten beperken → ter hoogte van de aansluiting een brandwerend onderdeel van in totaal 1 meter voorzien, dat gedurende 1 uur vlamdicht is, onder vloer E60(i → o) en boven vloer E60(o → i). (enkel bij middelhoogbouw en hoogbouw)



Oplossingen te testen volgens : **EN1364-4**
